		03 MAINTENANCE

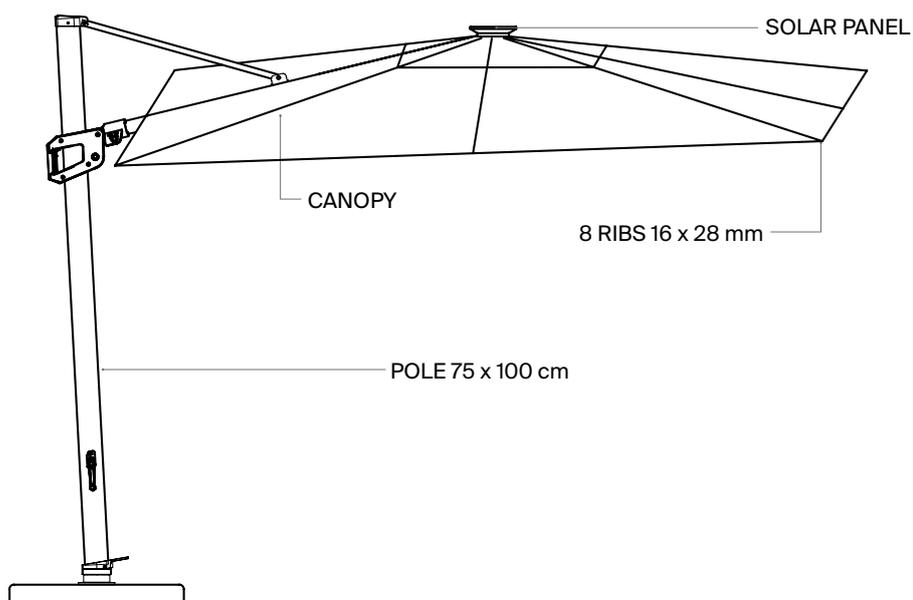

DESCRIPTION

Calpe is a versatile, elegant cantilever parasol designed for hotels, restaurants and gardens, featuring LED lighting powered by a solar panel.

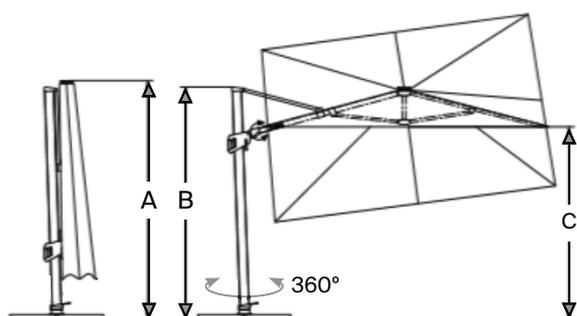

MATERIALS

- Structure : Aluminium
- Fabric: Olefin

MAIN COMPONENTS

DIMENSIONS

Model	A	B	C
<p>3 x 3 m</p>	252 cm	255 cm	215 cm

MAINTENANCE

The CALPE parasol is a unique product in which the construction solutions and materials used are of premium quality and deliver maximum durability. Therefore, routine maintenance is minimal, allowing you to keep it in perfect working order and with a pleasant appearance with only limited interventions. Below are a number of simple guidelines that must be followed.

CANOPY

Canopy maintenance is limited to cleaning. If you want to keep the part exposed to the weather as good as new, clean it 2 or 3 times a year to prevent dust or pollution from settling on the CANOPY due to sun exposure.

- OLEFIN: Dry cleaning

STRUCTURE

The aluminium must be cleaned using water and neutral soap.

WARNING

The parasol's main function is to reduce exposure to solar rays; it does not provide 100% protection from rain.

We believe in the *elegance* of engineering.
