DESCRIPTION

Bamboo, aluminium, and a streamlined profile come together in Novara, the parasol designed for gardens, terraces, and pools that demand a natural touch without compromising technical precision.

MATERIALS

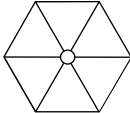

- Structure: Bamboo
- Fabric: Polyester

MAIN COMPONENTS

DIMENSIONS

Model	A	B	C	D
	209 cm	105 cm	212 cm	175 cm
Ø 1,8 m				

MAINTENANCE

The NOVARA parasol is a unique product in which the construction solutions and materials used are of the highest quality, ensuring maximum durability. As a result, ordinary maintenance is minimal, allowing you to keep it in perfect working condition and with an attractive appearance with only a few interventions. Below are some simple rules that must be followed.

CANOPY

Maintenance of the fabric is limited to cleaning. To keep the exposed part looking like new, clean it 2 or 3 times a year to prevent dust or pollution from settling on the fabric due to sun exposure.

- POLYESTER: Dry cleaning

STRUCTURE

Bamboo should be cleaned with water and neutral soap.

ATTENTION

The main function of the parasol is to reduce the incidence of sunlight; it does not provide 100% protection against rain.

We believe in the *elegance* of engineering.
