DESCRIPTION

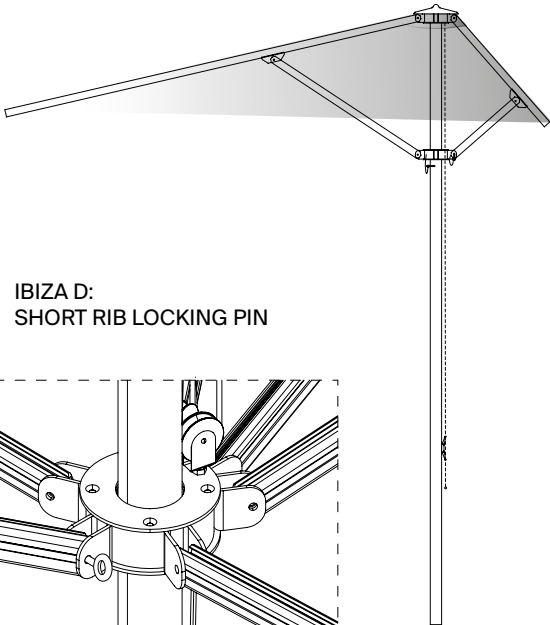

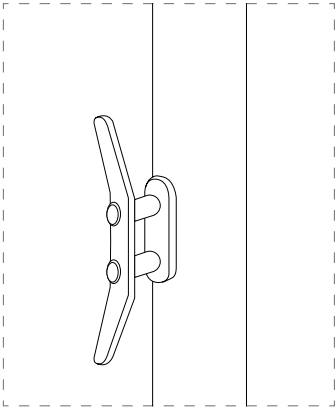

The Ibiza parasol is both robust and lightweight, with compact dimensions that make it ideal for covering small and medium outdoor areas while adapting easily to any space. This parasol has been designed with functionality, lightness and safety in mind, taking into account structural calculation criteria to ensure smooth manual opening and closing. It is equipped with a safety pin that is easy to install and ensures correct fabric tension. In its offset version, the Ibiza-D parasol maintains the same characteristics as the Ibiza model, but with the particular advantage of a lateral mole that frees up more usable space under the canopy.

* Parasols can be manufactured with an additional 20 cm in mast length, affecting dimension (c) and the **clear passage height (d)**, which will be **2.50 m**.

OPTIONS AND ACCESSORIES

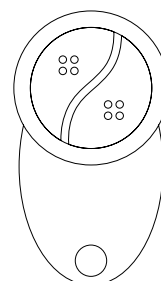

- Rib lighting kit
- 12V portable battery for lighting
- Lighting kit with removable ribs
- Heating kit
- Valance
- Side curtains
- Parasol joint rain gutter
- Telescopic cover with pole

EMITTERS

CONTROL OF THE OPTIONS AND ACCESSORIES OPTIONAL

EMITTER TXP

Power supply	3V ± 10%
Lithium battery	CR2430
Battery lifespan	>2 years
Protection rating	IP20
Measures	86 x 86 x 9,5 mm
Operating temperature	-5°C~50 °C
Radio frequency	868 MHz
Operating range	100 m

LIGHTING CHARACTERISTICS

RIBS LIGHTING

OPTIONAL AND BATTERY POWERED ONLY

SPOKES

Colour	Warm white
Colour temperature	2700°K
Consumption	4,8W/m
Voltage	24V
Protection rating	IP 64

BATTERY CHARACTERISTICS

OPTIONAL

REMOVABLE BATTERY KIT FOR RIB LIGHTING

- 12 V LED light kit with adjustable intensity powered by battery
- Battery with intensity control for 12 V single-colour LED
- Waterproof cover tied to the mast, easily removable
- Battery life: 5 h aprox.
- Protection rating: IP54
- 4 aluminium LED strips
- Warm white light
- Length: 530 mm
- Connection cable for 4 LED profiles
- LED protection rating: IP65
- Connection cable
- IP65 connector
- 2 Emitter TXP

MAINTENANCE

This is a unique product in which the construction solutions and materials used are of the highest quality, ensuring maximum durability. Consequently, routine maintenance is minimal, allowing you to keep it in perfect working condition and with an attractive appearance with only a few interventions. Below are a few simple rules that must be followed:

CANOPY

The maintenance of the canopy is limited to cleaning. If you wish to keep the part exposed to the weather looking like new, clean it two or three times a year to prevent dust or pollution from accumulating on the fabric due to sunlight.

- **PVC:** Spray with water and neutral soap, wait a few minutes for the soap to take effect and then, using a sponge, remove the dirt gently without pressing. Repeat the process if necessary and rinse thoroughly with water.
- **ACRYLIC:** Dry cleaning
- **POLYESTER:** Dry cleaning

STRUCTURE

Aluminium cleaning should be carried out using water and neutral soap.

ATTENTION

The main function of the parasol is to reduce the impact of sunlight; it does not provide 100% protection against rain.

The offset parasol with a valance may show wrinkles due to the asymmetrical distribution of the ribs required for the mast's lateral displacement.

We believe in the *elegance* of engineering.
