

CINEMA CITY

PROJECT DESCRIPTION

Cinema city in Jerusalem, is the largest entertainment complex and cultural centre of this Israeli city. With an area of 20.000m², with 19 screening rooms and an inner hall. The covering, the very first that includes a system of transparent ETFE foils, combines 6 translucent fabric membranes and 5 transparent sheet membranes.

CHARACTERISTICS

Material	PES/PVC Ferrari ref. 1502 T2
Application	Commercial centres
Surface	2.656m ²
Location	Jerusalem
Developer	New Lineo Cinema
Year	2014

TECHNICAL DATA

The V type fabric in the translucent section is the most resistant. The transparent areas were made with a monolayer system of ETFE reinforced with stainless steel

cables. A covering that offers brightness, protection and natural ventilation.
