

FAN MALLORCA SHOPPING

PROJECT DESCRIPTION

The project to enlarge the Carrefour S'Estada shopping centre included new façades where architectural textile solutions were applied. The constructional solution is of prefabricated textile panels arranged vertically, built with the IASO i-tensing system to provide a light façade alternating colours and in a zigzag layout to give the enclosure dynamism.

CHARACTERISTICS

Material	PES/PVC
Application	Comercial centre
Surface	695m ²
Measures	I-tensing panels: 7.5 high x 2.5m wide approx.
Location	Palma Mallorca
Architect	Broadway Malyan
Year	2016

TECHNICAL DATA

Enclosure built with the i-tensing façades construction system.

Exclusively IASO system

This is an industrialised panel made with aluminium profiles and pre-tensed textile membrane. It provides advantages in the speed of installation on site, possibility of combining textiles and colours, etc.
